The Gig: Product Designer I

Given the next set of internet users are going to be quite different from the ones on it currently especially given that they wouldn't have grown up with consumer internet and internet needs like search. For such users, how do we craft up the right experience and reduce apprehensions towards online shopping? The problems we are trying to solve are as complex as the stakes are high.

We're looking for talented Designers to join the Flipkart Product Design team in Bangalore.

What this job entails:

As Design team, we work on products that empower our users to push the boundaries of customer's shopping experience. Informed by research and data, we solve complex needs and build iteratively toward our vision. We ship high-fidelity designs of new features and prototype solutions.

We own these projects from start to finish and collaborate with a multidisciplinary team of developers, product managers, content strategists, and researchers to deliver the best possible experience.

Description : You'll be working on:

- Advocating for good user experience across our platform by representing our users in design brainstorming discussions.
- Identifying the appropriate UX methods and tools to use depending on project constraints.
- Prototyping solutions to solve complex problems.
- Contributing to our growing design system of patterns in an effort to cultivate a cohesive look, feel, and user experience across the entire Flipkart platform.
- Sharing and reviewing your designs based on peer feedback, research, and testing.
