Company : Fareportal
Company Name : Fareportal
Nature Of Business : Technology/Travel
Designation : Associate Software Engineer
Tentative Job Location : Gurgaon

People are at the core of Fareportal. We are one of the fastest growing travel technology companies in the world; our portfolio of travel brands, including flagship product CheapOair, receive over 100 million visitors annually.

We are seeking a .NET Software Engineer who will manage project goals, contribute to product strategy and help define best practices. The right candidate will join a self-sufficient offshore team responsible for developing and maintaining components of a complex proprietary e-commerce platform that drives the air travel industry. The right candidate will also have opportunities to collaborate with teams in NY and other locations around the world.

Responsibilities

- * Design develop and support cutting edge, rock solid technology products
- * Develop and deliver high quality, clean and maintainable code
- * Develop applications with strong requirements of High Load and Scalability
- * Collaborate with business teams to understand objectives.

Requirements

Description : Good understanding designing and implementing applications using an OOP language

Required Knowledge and Skills

- Good understanding of .Net programming and systems design
- Attention to detail and a passion for producing high quality software
- Excellent communication skills
- Strong hands on development experience in .Net framework
- Experience in C# / .Net Framework using Visual Studio
- Exposure in Web API, ASP.NET MVC.
- Experience in JavaScript & jQuery
- Experience in Microsoft SQL Server
- Understanding and practical usage of software developmentÂ principles (i.e SOLID, DRY, YAGNI, KISS etc.)
- * Ability to work effectively and independently with minimal supervision
- * Ability to work within a fast-paced, dynamic environment
- * Strong analytical, troubleshooting and problem solving skills
- * Eager to learn new technology stack
