Companies open to your department

Company :	Hilabs
Company Name :	Hilabs
Nature Of Business :	
Designation :	Data Scientist
Tentative Job Location :	Pune (Maharastra)
Description :	Candidates will be working with our Data Science team in developing and implementing machine learning algorithm in various Hilabs applications focussed towards finding anomalies and patterns in medical claims data(of our US insurance clients)

As a Data Scientist at HiLabs, you will be working with our excellent Data Science team which has candidates not only from the top IITs but also from top international universities like Georgia Tech and Carnegie Mellon.

Work at HiLabs is flexible, scalable and has a lot of exposure for the candidate. It will majorly revolve around developing and implementing machine learning algorithms in various HiLabs applications which are used to find anomalies and patterns in the enormous healthcare data. The ML algorithms include high-end NLP techniques, SPG, Decision tree and other pattern mining algorithms.

In terms of exposure, the candidate will get to interact with the management team who are alumni from Yale, Harvard and IIM Calcutta, and carry with them rich business knowledge. The candidate will also get the opportunity to work directly with the clients and own a project.

HiLabs is also involved in various competitions and hackathons which will give the candidate immense knowledge beyond regular work. Candidates will also get an opportunity to be part of white papers/research publications.

Our clients range from fortune 500 companies like Anthem to government entities like Office of Inspector General. Candidates with good performance in the company are also given an opportunity to come to US and work as an onshore data scientist.

(Background of company)

The idea for HiLabs was born when Amit Garg and Neel Butala took Venture Capital and Private Equity Investment course together at the Yale School of Management. They both understood the promise that big data held to improve care and cut costs in the healthcare sector. They converted their business plan, which was a finalist in the Yale Entrepreneur Institute competition, into HiLabs in 2014.

We expect Candidates to have:

Â· Good algorithmic skills

Â· Able to adapt to a start-up environment

Â· Analytical mindset

Â· Good communication skills

Â· Basic machine learning knowledge.

Nice to have:

Â· Domain knowledge of health care

Â· Knowledge in handling Big data (example: with spark)

Â· Relevant internship in the data science field

Visit our site at http://www.hilabs.com/ Â for more Information. |
